DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to methods for treating melanoma, classified in class 514, subclass 2.
 - II. Claims 18-20, drawn to methods for marketing pegylated interferon alpha, unclassified.
2. The inventions are distinct, each from the other, for the following reasons:

The inventions of group I are drawn to method which are entirely different in steps performed and end result from the methods of group II. The two groups of inventions would require different searches in the U.S. Patent shoes and in the non-patent literature.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1642

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
